

2nd European Motor Challenge Workshop

A European collaboration - Energy savings in enterprises.

Tuesday, February 27th, 2007

Paris, Espace Saint Martin, 199 bis rue Saint Martin - 75003 PARIS

Controlling the energy consumption is today both for Europe and European companies an economical and environmental key requirement.

The motor systems account for 70 % of the electricity consumption in the European industry (compressed air system, pumping, cold production, ventilation, electrical drive systems ...). Presently 23 countries co-operate actively with the European Commission to develop a powerful, active and efficient synergy throughout the different territories.

There is a very significant potential of energy savings with electrical systems. The European Motor Challenge programme is aimed at helping companies enhance and upgrade the energy consumption of their motor systems. In order to implement this programme with the voluntary companies and to share the first successful experiences with all the actors involved in energy management,

Paolo BERTOLDI

European Supervisor of the
Motor Challenge programme
European Commission

Jacques-Olivier BUDIN

Coordinator of the DEXA-MCP Project and the Motor
Challenge programme in France
ADEME (French Environment and Energy Management
Agency)

Invite you to attend

the 2nd European Motor Challenge Workshop

SCHEDULE

Morning's SESSION 10:00 am – 1:00 pm

- **Opening of the session - Welcome**
ADEME
- **How do the energy savings stand in the national policies?**
Representative of the national policies
- **The Motor Challenge programme : a programme of the European energy efficiency policy.**
European Commission - IEEA
- **Motor Challenge : every player wins ! Examples of good practices in France and in Europe.**
Testimonies from 2 Motor Challenge National Contact Points
Promotion by the endorsers
Energy efficiency action plans by 2 Motor Challenge Partners..
- **2007 objectives for the Motor Challenge programme : views from the 2 European Motor Challenge projects.**
DEXA-MCP project - Dissemination Extension and Application of the Motor Challenge Programme - 11 countries - Jacques-Olivier BUDIN
4EM-MCP project - Energy Efficient Electric Motor Systems in New Members and Candidate Countries - 5 countries - Michal Ramczykowski
- **Motor Challenge Prize Award.**
Paolo Bertoldi - European Motor Challenge Coordinator

Lunch / Meeting / Exchanges 1:00 pm to 2:30 pm

Afternoon's SESSION 3:00 pm – 5:00 pm

Work and analysis groups on different topics of the Motor Challenge programme:

1 - Enhancing the possible synergy between national contact points, partners and endorsers;

2 - The cooperation between the European level of the Motor Challenge programme and the national/locals levels: how to combine the different knowledge and possibilities of the different levels;

3 - The efficient communication:

- to promote the Motor Challenge programme and the involved enterprises: partners and endorsers.

- to promote exchanges between the actors to lead to an efficient benchmarking

Please confirm your intention to attend this Workshop by email to:

jacques-olivier.budin@ademe.fr by **February 7th, 2007**, and specify your postal address.

You will be sent by mail a personal invitation along with the detailed schedule of the Workshop 2007, an access plan and the practical modalities.

Free entrance.
